OVERVIEW

1

Purpose and Applicability

This regulation

- sets responsibilities and procedures for overspraying of Fort Hood aircraft.
- applies to all Fort Hood maintenance units or activities supporting division, brigade, non divisional, and non-corps elements within Fort Hood's area of logistical responsibility.

1a

Reference

Required and related publications are listed in appendix A.

1b

RESPONSIBILITIES

2

Aviation Unit Maintenance (AVUM)

AVUM is responsible for

- surface preparation and
- spot painting of aircraft.

Spot painting is minor touch-up painting of the aircraft painted surfaces.

2a

Aviation Intermediate Maintenance (AVIM)

AVIM is responsible for complete overspraying of deteriorated aircraft painted surfaces that are beyond the capabilities of AVUM.

2b

PROCEDURES

3

Overspraying

For overspraying requirements exceeding the limited capabilities of the AVIM units, submit a work request to the 169th Maintenance Battalion.

The 169th Maintenance Battalion submits the work request to the materiel officer certifying that

- 60 percent or more of aircraft require spot painting or
- major structural work has been performed which requires preservation and overspray.

The work request is then sent

- through Corps Maintenance Management Office (CMMO)
- to DOL.

3a

PRIORITIES

4

DOL. When DOL, Maintenance Division receives the work request an estimated date for overspraying will be provided to the unit.

- The oldest work request will be worked first unless an exception is granted by the CMMO.

The unit will be contacted 5 workdays before the estimated date to schedule the exact day for overspray.

If the unit fails to submit the aircraft for overspray on the scheduled date, the

- work request will be canceled and
- unit must resubmit the work request.

4a

EXCEPTION TO POLICY

5

AVIM Units Submit request for exception to policy with justification

- through G4
- to the CMMO.
