

Killeen, did you know?

Retail electric rates prior to electric deregulation in 2002 were about a dime per kilowatt hour.

Now, you can get a wide range of rates and products starting as low as a nickel.

Just remember, it doesn't matter which company sends you your bill as you will continue to have the same reliable, electric service from our local transmission company. Below is a sample of today's market prices:

Rate Type	Lowest	Highest
Regulated Rate (12/31/01)	9.7 ¢	9.7 ¢
Variable Product (7/26/11)	4.5¢	13.4¢
Fixed Term Product (7/26/11)	8.1¢	13.2¢
