

LOW WATER CROSSING

Installation Operations Center

DATE/TIME: 220505S DEC 16

Details on all Low Water Crossing are posted on the Fort Hood homepage
http://www.hood.army.mil/status/low_water_crossing_status.pdf

The purpose of this report is to facilitate commanders risk assessments. It does not include all potential stream crossing sites in the training area (hasty, improvised, intermittent, etc.), just those listed below/on the Ft Hood training map. It is not a risk assessment and is not intended to replace a commander's authority and responsibility to assess risk for his/her units.

Confirmed by Mr. Smith, Range Operations

CROSSING SITE STATUS IS AS FOLLOWS: OPEN (UNLESS LISTED BELOW AS CLOSED)

<u>SITE</u>	<u>GRID</u>	<u>SITE NAME</u>	<u>STATUS</u>	<u>REMARKS</u>
1	PV04804642	Cowhouse Creek	OPEN	INCREASED RISK

3	PV14855405	West Range Rd / Cowhouse Creek Bridge	OPEN

STATUS OPEN: Site is open, typical stream crossing hazards exist requiring risk assessment prior to crossing.

STATUS INCREASED RISK: Site is open, increased hazards exist requiring risk assessment. Tactical crossings may be open, but increased hazards may result in commanders/vehicle commanders deciding not to cross based on the results of their risk assessment.

STATUS CLOSED: Site is closed, significant increased hazards exist.

Note 1: When the Low Water Crossing report status turns **CLOSED**, immediately notify the MSCs and PAO telephonically and email the updated Low Water Crossings report.

Note 2: Once the determination has been made to close any hard stand and bridge water crossing sites on Fort Hood Range Support Operations / DES will contact the IOC. The IOC will in turn contact all MSCs and PAO on call IOT inform the community of the change in the cantonment LWC status.

Note 3: Once weather has cleared, Range Support Operations / DES will assess the possibility of re-opening the crossing sites. Range Support Operations / DES will determine if and when tactical, hard stand and bridge crossing sites should be re-opened based on weather and safety conditions. Once

LOW WATER CROSSING

the determination has been made to re-open the sites, the IOC will be notified. IOC will in turn notify all MSCs and PAO of the change and up-date the LWC report.

Note 4: IAW OPERATION ORDER PW 16-10-0940 (LOW WATER CROSSING REPORT) All Fort Hood Units report receipt of the Low Water Crossing Report when crossing are closed to the IOC to fulfill III Corps CG directive at (254) 287-2506 or usarmy.hood.usag.mbx.ioc@mail.mil.

Point of contact for this information is Range Operations at 287-3130, 288-6016 and Fax 287-2793 or the Installation Operations Center at 287-2520.
