**BLANK AMMUNITION FIRING ATTACHMENT:
M2 MACHINE GUN**

Functional Description:

The firing attachment consists of one muzzle restriction with orifice, three spacer rods, one support, attaching hardware and guide assembly. It allows the weapon to function by restricting the gas flow at the muzzle end of the barrel. The guide assembly is used to act as a spacer to assure proper feeding of a live round of ammunition into the feedway. The attachment is designed to fire the production improved M1A1 blank ammunition.

Purpose of Trainer:

The device permits firing of linked blank .50 caliber ammunition with the M2 machine gun. It will function as the weapon effect signature simulator for the M2 machine gun in engagement simulation systems such as the Multiple Integrated Laser Engagement System (MILES).

Physical Information:

Length: 33"; Diameter: 5"

Equipment Required, Not Supplied:

M2 Machine Gun
M1A1 Blank Ammunition
