

TARGET BOX PADDLE

Functional Description:

DVC-T 07-086, **Target Box Paddle**, is a plate of Plexiglas, 12 5/8" in length, with a silhouette target (scaled for 250 meters at 25 meters and 15 yards) on each end. On the center of the handle there are 2 circles (4cm and 1cm). The smaller one is for checking the shot group size during the target box exercise and the larger circle is for the live fire exercise. Soldiers look through the sights of an M16A2 (in a cradle) and tell their counterparts downrange in which direction they need to move the target paddle to achieve proper aiming point. When the proper aiming point is achieved, the assistants mark the target board. Firers need to have 3 out of 3 shots within the 1cm circle to receive a go on the exercise.

Purpose of Trainer:

Practice with this device insures that soldiers can find the same aiming point each time they fire.
